About the Dietary Strategy

This dietary plan has been created based on the food history assessment, the energy requirements associated with all of your activities, including physical exercise, and your food preferences.

Initially, I recommend weighing all foods raw and without waste. Over time, you will learn to estimate portion sizes without needing a scale. I have created a dietary plan that allows you to freely choose from the proposed meals every day, based on your tastes, time available, and food availability.

In this regard, by respecting the suggested quantities, you can consume the same percentage of calories by combining different foods from day to day. Remember to alternate snacks, main dishes, and side dishes between lunch and dinner, and from one day to the next. This will not only prevent the daily repetition of foods but also avoid the accumulation of substances in the intestines, which over time could lead to the development of adverse reactions to foods consumed too frequently.

It is crucial to consider each food as medicine, necessary for your body in the recommended doses and timing.

Remember, it is essential to have breakfast within an hour of waking up, and to wait no more than 3-4 hours between meals and snacks, as well as between one snack and the next meal. It is important to always consume your snacks and never skip from one meal to another with a 6-7 hour fast! This will help maintain a stable blood sugar concentration, preventing blood sugar spikes and the subsequent rise in insulin hormone levels, which are responsible for the development of diet-related diabetes. Furthermore, this will prevent uncontrolled hunger and allow you to reach mealtimes calmly.

Start to see your diet as a means to not only reach your ideal weight but, more importantly, to achieve a psychological and physical well-being that can be integrated into every moment of your day thanks to the daily changes that the new eating style will bring to your body and mind.

Daily Caloric Needs: Approximately 3,200 kcal
Macronutrient Breakdown:

- Protein: 166g (664 kcal)
- Carbohydrates: ~480g (1,920 kcal)
- Fats: 99g (895 kcal)

Meal Plan Overview

Meal	Caloric %	Calories (kcal)	Key Components
Breakfast	20%	~620 kcal	Carbs (simple & complex), small protein, healthy fats. Yes to yogurt and milk.
Post-Workout Shake	~10%	~300 kcal	Protein powder (30 g), lactose-free milk (150 ml), fruit or oats for carbs.
Lunch	35%	~1085 kcal	Balanced with carbs (pasta, rice, cous-cous), protein (meat, fish, legumes), vegetables, fruit.
Snack	5-10%	~250 kcal	Mix of simple and complex carbs, small protein, healthy fats (e.g., nuts).
Dinner	25%	~775 kcal	Balanced meal with carbs, lean protein (chicken,with fish, tuna, eggs) vegetables, fruit, small healthy fats.

Breakfast Options (620 kcal)

Option	Foods	Calories	Carbs	Prot	Fat
1	Whole-grain toast (50 g), sugar-free jam (20 g), Greek yogurt (150 g), banana (120 g), nuts (10 g)	620 kcal	78 g	14 g	9 g
2	Oats (40 g), skimmed milk (200 ml), apple (100 g), honey (15 g), almonds (10 g)	620 kcal	80 g	14 g	9 g
3	Whole-grain biscuits (40 g), honey (15 g), Greek yogurt (150 g), kiwi (150 g), flaxseeds (10 g)	620 kcal	78 g	13 g	9 g
4	Porridge (oats 40 g, milk 200 ml), honey (15 g), cocoa (10 g), pear (150 g), nuts (10 g)	627 kcal	79 g	14 g	10 g

- **Breakfast Options:** Swap oatmeal for whole-grain cereal with almond milk and sliced bananas or whole-grain toast with almond butter and jam.

Post-Workout Shake (300 kcal)

Option	Foods	Calories	Carbs	Prot	Fat
1	Protein powder (30 g), skimmed milk (150 ml), banana (120 g), almonds (5 g)	307 kcal	35 g	36 g	5 g
2	Protein powder (30 g), skimmed milk (150 ml), oats (50 g), cocoa (5 g)	364 kcal	38 g	36 g	4 g
3	Protein powder (30 g), skimmed milk (150 ml), apple (150 g), almonds (10 g)	314 kcal	34 g	36 g	6 g
4	Protein powder (30 g), skimmed milk (150 ml), strawberries (150 g), nuts (15 g)	314 kcal	34 g	36 g	6 g

Lunch Options (1085 kcal)

Option	Foods	Calories	Carbs	Prot	Fat
1	Basmati rice (120 g), turkey (150 g), grilled zucchini (150 g), olive oil (10 g), nuts (10 g)	1085 kcal	135 g	47 g	26 g
2	Whole-grain pasta (100 g), steamed cod (200 g), broccoli (150 g), olive oil (10 g), walnuts (10 g)	1085 kcal	135 g	46 g	27 g
3	Pearl barley (100 g), cooked lentils (150 g), raw carrots (150 g), olive oil (10 g), pear (150 g), sunflower seeds (10 g)	1085 kcal	132 g	42 g	28 g
4	Whole-grain couscous (100 g), grilled chicken (150 g), roasted peppers (150 g), olive oil (10 g), strawberries (200 g), walnuts (10 g)	1085 kcal	134 g	46 g	27 g

- **Lunch Options:** Use tuna (100 g) or 2 eggs as proteins alternate with quinoa or farro instead of rice.

Snack Options (250 kcal)

Option	Foods	Calories	Carbs	Prot	Fat

1	Whole-grain bread (40 g), sugar-free jam (20 g), almonds (10 g)	215 kcal	26 g	4 g	10 g
2	Whole-grain crackers (30 g), banana (100 g), mixed nuts (10 g)	270 kcal	34 g	4 g	10 g
3	Greek yogurt (150 g), honey (15 g), strawberries (150 g), walnuts (10 g)	250 kcal	30 g	11 g	8 g
4	Rice cakes (30 g), sugar-free jam (20 g), flaxseeds (10 g)	220 kcal	30 g	3 g	8 g

- **Merenda Options:** Consider fruit smoothies with protein powder or energy bars made from oats, nuts, and honey.

Dinner Options (775 kcal)

Option	Foods	Calories	Carbs	Pro	Fat
1	Basmati rice (90 g), chicken breast (150 g), grilled eggplant (150 g), olive oil (10 g), nuts (10 g)	775 kcal	120 g	45 g	20 g
2	Cous-cous (80 g), steamed cod (150 g), boiled spinach (150 g), olive oil (10 g), apple (150 g), seeds (10 g)	775 kcal	123 g	44 g	21 g
3	Whole-grain pasta (80 g), turkey (150 g), sautéed peppers (150 g), olive oil (10 g), kiwi (200 g), walnuts (10 g)	775 kcal	121 g	45 g	20 g
4	Brown rice (100 g), boiled eggs (2, 120 g), steamed zucchini (150 g), olive oil (10 g), flaxseeds (10 g)	775 kcal	122 g	44 g	21 g

- **Dinner Options:** Use different vegetables and sauces to keep meals interesting; try baked sweet potatoes (200 g) or whole-grain wraps filled with grilled chicken and veggies.

Post-Dinner Snack Options (5-10% of Total Calories, ~250 kcal)

Option	Foods	Calories	Carb	Prot	Fat

1	Almonds (20 g), dark chocolate (30 g), walnuts (10 g)	260 kcal	19 g	6 g	20 g
2	Whole-grain rice cakes (2 cakes, ~30 g), peanut butter (15 g), chia seeds (5 g)	250 kcal	30 g	7 g	12 g
3	Banana (120 g), mixed nuts (20 g)	255 kcal	34 g	4 g	12 g

10 Easy meal-pre suggestions for the week.

Designed to be simple and convenient while still meeting your nutritional needs for training and recovery, these options require minimal cooking and can be prepared in bulk for the week.

1. Chicken and Rice

- **Ingredients:** Grilled or roasted chicken breast, cooked basmati rice, and steamed vegetables (broccoli, carrots, zucchini).
- **Prep Tip:** Cook a large batch of rice and chicken at the beginning of the week, store in the fridge, and portion out for lunch and dinner. Reheat and add vegetables for a quick meal. Add seeds and herbs

2. Tuna Salad Wraps

- **Ingredients:** Canned tuna, whole wheat tortillas, mixed greens, Greek yogurt (or light mayo), olive oil, lemon juice.
- **Prep Tip:** Mix the tuna with yogurt or mayo and season with lemon juice and olive oil. Wrap in tortillas with greens for a quick lunch or snack. Prepare the tuna mix in advance and keep it in the fridge for easy wrapping.

3. Stir-Fried Veggies with Tofu

- **Ingredients:** Firm tofu, mixed frozen vegetables (or fresh), soy sauce, olive oil, garlic, ginger.
- **Prep Tip:** Sauté the tofu in olive oil until golden, then stir-fry the vegetables with soy sauce, garlic, and ginger. You can portion it out and store it in the fridge for a quick meal.

4. Baked Sweet Potatoes and Chicken

- **Ingredients:** Chicken breast, sweet potatoes, olive oil, salt, pepper, your favorite seasoning.
- **Prep Tip:** Bake sweet potatoes and chicken on a sheet tray, seasoning both. Bake together in the oven and store in the fridge. Just reheat when ready to eat.

5. Egg Muffins

- **Ingredients:** Eggs, spinach, mushrooms, bell peppers, salt, and pepper.
- **Prep Tip:** Whisk the eggs and mix with chopped vegetables. Pour into muffin tins and bake. You can prepare several for the week, and they're easy to grab and go.

6. Pasta with Lentils and Tomato Sauce

- **Ingredients:** Whole-grain pasta, lentils, tomato sauce, garlic, and onions.
- **Prep Tip:** Make a large batch of lentils with tomato sauce and cook the pasta in bulk. Store them together and reheat before serving.

7. Overnight Oats

- **Ingredients:** Rolled oats, milk (or plant-based milk), chia seeds (1 tbs), honey, and fresh fruit.
- **Prep Tip:** The night before, mix oats, milk, and chia seeds in jars. Let it sit overnight, then add fresh fruit in the morning for a quick, balanced breakfast.

8. Grilled Salmon with Quinoa and Veggies

- **Ingredients:** Salmon fillets, quinoa, mixed vegetables (steamed or roasted), olive oil, lemon.
- **Prep Tip:** Grill or bake salmon, cook quinoa, and steam veggies in bulk. Store in separate containers for an easy meal.

9. Rice and Beans

- **Ingredients:** Brown rice, black beans, corn, salsa, avocado, lime juice.
- **Prep Tip:** Cook rice and beans in bulk and keep in separate containers. Mix together when ready to eat, adding salsa, corn, avocado, and lime juice for extra flavor.

10. Greek Yogurt Parfaits

- **Ingredients:** Greek yogurt, honey, granola, mixed berries, chia seeds.
- **Prep Tip:** Layer Greek yogurt, granola, and berries in jars for an easy snack or breakfast. Keep them refrigerated and grab when you're hungry.

Supplements for Athletic Performance

Creatine

- **Dose:** 5 g per day
- **Post-Workout:** Take 5 g after your gym workout with a meal that includes both carbs and protein (ideally with protein shake).
- **Note:** Be sure to drink plenty of water when taking creatine to avoid any stomach discomfort.

Magnesium

- **Magnesium Bisglycinate:**

This form is easily absorbed and gentle on the stomach. It also helps with muscle relaxation and improving sleep quality.

Best for: Intense training periods and supporting nighttime recovery.

- **Magnesium Malate:**

Great for energy production (via the Krebs cycle). It helps reduce feelings of fatigue and chronic tiredness.

Best for: Athletes who feel consistently drained or need an energy boost.

- **Daily Dose for Athletes:** 300-400 mg of magnesium per day.

How to split the doses:

  - **After training:** To support muscle recovery.

- **Before bed:** To promote muscle relaxation and better sleep quality.

Protein Powder

- **Dose:** 30 g + 150 ml of lactose-free semi-skimmed milk + enough water to blend
- **Option 1 (Best Time):** After a workout, have a shake with 30 g of protein and a carb source (e.g., banana, oats) to boost muscle recovery and replenish glycogen stores.
- **Option 2 (Weekend/Work Days):** If you're struggling to hit your daily protein goal, you can add a protein shake mid-morning or mid-afternoon for a quick boost.

Guidelines for Seborrheic Dermatitis (Recommended Foods)

- **Omega-3:** Salmon, mackerel, flaxseeds, walnuts.
- **Zinc:** Pumpkin seeds, turkey, chicken, eggs.
- **Vitamins A, E, D:** Carrots, spinach, avocado, olive oil, eggs, fortified milk.
- **Probiotics:** Natural yogurt or kefir.
- **Anti-Inflammatory Foods:** Berries, turmeric, green tea.

Avoid:

- Ultra-processed foods, refined sugars, and too much saturated fat.
